Services and Support

Networking Support

Our Network Technicians, certified by Cisco (CCNA) can customize your network solution to meet your business requirements. We will arrange for a complimentary on site networking consultation where we will spend the time required obtaining a thorough understanding of your infrastructure requirements. We can provide new network installation, upgrade your existing computer network, and offer complete networking support utilizing the latest technology. Our Network technicians are also well experienced with wireless networks.

Structured Media Wiring

Double Eagle Services, Inc provides data, voice and video cabling for residential and commercial clients. As Certified Leviton installers, working with new home builders, Double Eagle Services, inc can lay the foundation of your digital home by installing a structured media control center, allowing for a central point where data, video, voice, whole house audio, and security CCTV systems come together.

Television and Home Theater

Double Eagle Services, Inc residential clients home theater installations, including mounting LCD and plasma televisions, installing surround sound speakers, and other home theater equipment. Whether you need help with planning your home theater, or just the installation, Double Eagle Services, Inc is there for you.

Computer Sales & Support

Double Eagle Services, Inc. provides technicians for on-site computer support for commercial and residential clients. We offer comprehensive support contracts and maintenance plans to ensure that your computer systems provide the performance your business requires. Using hardware and software diagnostic tools our technicians can quickly troubleshoot and resolve workstation issues.

We custom builds desktops, workstations, notebooks, and servers for our clients delivering the performance they require at an affordable price. From basic internet computers to performance Dual Core workstations, Double Eagle Services, Inc can develop a solution that fits your requirements and budget.

Web Site Development

Double Eagle Services, Inc. is a full service, custom web site design and development company. We will build you a web site that is designed to your specifications. We can build a new web site or redesign an existing web site, one that will improve your Internet presence. We also offer web site maintenance plans.

DVR Security Solutions

Forget those bulky old monitors and VCR tapes, our Digital DVR's store up to 6 months worth of video and can be viewed right over your desktop. Monitor the safety of children, your home, office, or parking lot from any internet connection. Our DVR solutions provide remote viewing during daylight or darkness.

Systems Integration

Double Eagle Services, Inc specializes in delivering a complete turnkey solution for our clients technology infrastructure. Using proven technologies, our design engineers offer an integrated solution that achieves our clients requirements while minimizing total cost of ownership and support costs.

NITIX

Double Eagle Services, Inc is a certified partner of Net Integration Technologies, allowing us to implement an integrated server solution that has the lowest TCO in the industry. NITIX, an autonomous, Linux-based server operating system provides a complete line of business server solutions designed to fulfill all your Information Technology needs.

Telephone Systems

From the smallest office to the largest, Double Eagle Services, Inc has affordable phone systems. We offer Digital PBX systems, such as the NEC DSX series, as well as a VOIP Voicehawk Phone System and the Linksys One Solution.
